MAP UPDATE INSTRUCTIONS

**IMPORTANT:** Read these instructions in their entirety before you begin updating the navigation system.

- Park your vehicle outside in a safe, well-ventilated place. Do not start or continue the update while driving.
- Engine must be running to prevent the battery from discharging during the update.  
  *Note: Loss of power during the update can cause navigation system damage.*
- Do not drive your vehicle at any time during the update. The update will take 15-20 minutes to complete.
- The navigation function is not useable during the map update.
- The navigation system can’t go back to the previous version after the map update.

**Preparation**

- Before starting the update, make sure you have the password that came with the map update.
- Locate the USB interface required for the Navigation Map Update.
  - **Civic, Fit, and HR-V vehicles:** The USB interface is located in the lower portion of the center stack area under the Audio System.
  - **CR-V vehicles:** The USB interface is located inside the Center Console (Armrest).
  - **CR-Z vehicles:** The USB interface is located inside the Glove Box.

NOTES:
1. If there is more than one USB port in these locations, use Port #2
2. CR-Z owners: USB port may be hard to find in glove box. If you can’t see it, run your hand along the top of the glove box.

-2-
Installation

#1

- Start the engine and let the navigation system boot up.

#2

- The following Confirmation screen appears. Select OK.

#3

- Be sure you are on a map screen, then insert the USB device into the USB port.

  Note: Once you connect the USB device, don’t remove it or turn off the engine.

The following Notice screen appears. Select OK on the touch screen.

Note: With this update, the Notice screen shown below replaces the prior Confirmation screen. This screen will only appear for about 5 seconds, then change to the map screen regardless if OK is selected.

The map screen then appears.
